What is my username and password?

Included above: 1) Your name, 2) Your username and 3) Your password. Please note that your username and password are case sensitive. By default your password is valid for 180 days so change it every few months.

Who do I contact for help?

Scott Dowdle, System Admin, admin@montana.edu, EPS 262, 406-994-3931.

It is recommended that you check out the online Systems FAQ: <http://www.cs.montana.edu/faq>

How do I change my password?

ssh into esus.cs.montana.edu and run the passwd command. It will prompt you for your current password and then require that you type your new password in twice. 8 or more chars, combination of upper, lower, a digit and a symbol.

How do I install and setup SSH?

You use ssh to connect to the computer science server (esus.cs.montana.edu). It is an encrypted form of telnet. PuTTY is popular as is Cygwin / openssh.. Mac OS X and Linux include ssh clients. For additional software, consult "Available Software Downloads" section of the Systems FAQ.
